

Acquisition Reform Success Story

Joint Direct Attack Munition (JDAM)

Program Manager (PM): Mr. Oscar Soler
Program Executive Officer: Mr. Harry Schulte
Contractor: McDonnell Douglas Aerospace
Contractor PM: Mr. Charles Dillow
OPR: Lt. Col. Rich Walley DSN: 872-3525 x 3205

Program Description

A joint Air Force/Navy program to provide current fighter and bomber aircraft the capability to accurately and precisely attack fixed, or relocatable, land and maritime targets under adverse weather conditions from medium and high altitudes.

How Streamlining Made a Difference

A comparison of the JDAM Program at Request For Proposal (RFP) release in Aug 93 (PB FY95) and the current program (PB FY98) is an amazing example of a program office team that not only applies the letter of acquisition reform, but embraces the intent of acquisition reform. The JDAM program forged a government-contractor team that produced the following results and is meeting or beating all cost, schedule and performance requirements.

Measure	PB FY95	PB FY98
Military Standards and Specifications Used	87	0
Statement of Work Pages	137	2
Contract Data Requirements (CDRLs)	146	22
Warranty	5 Yrs	20 Yrs
Average Unit Price (40,000 units)	\$42.2K (BY93)	<\$20K (BY93)
Program Office Manning	80	39
Development Time	64 Mos	48 Mos
Development Cost (TY\$)	\$549.7M	\$461.7M
Production Time	15 Yrs	11 Yrs
Production Savings	0	\$2.9B

Bottom Line: JDAM increased the warranty from 5 yrs to 20 yrs (doing it **better**), decreased production delivery time by 48 months (doing it **faster**), and saved \$3.0B in program cost (doing it **cheaper**).
